STEAM FAMILY NIGHT

OCTOBER 8

FOOD AVAILABLE AT 5:00

$$\frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$
$$\frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$
$$\sin(\theta) = \frac{\text{opp}}{\text{hyp}}$$

STEAM FAMILY NIGHT

The background is a teal-colored collage featuring various mathematical and scientific illustrations. At the top, there's a quadratic formula
$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$
 and a right triangle with sides labeled 'a' and 'b'. Below the title, a quadratic equation
$$ax^2 + bx + c = 0$$
 is visible. To the right, a sine function definition
$$\sin(\theta) = \frac{\text{opp}}{\text{hyp}}$$
 is shown next to a right triangle. On the left, a partial illustration of a globe and the expression
$$V = \frac{4}{3}$$
 are visible. On the right, a person in a lab coat is shown holding a flask with orange liquid, with a 3D wireframe cube below it.

OCTOBER 8

**PRESENTATIONS at 6:00
and 6:30 BY EXCITING
PRESENTERS**
